

NASCOE'S Programs and Negotiations Committee

*Christa Kraatz and Sarah Houin, Programs and
Negotiations Committee (PNC) Co-Chairpersons*

What is the NASCOE Programs and Negotiations Committee?

The Negotiations and Programs Committee is one of the most important functions of NASCOE. The Programs Submissions and Negotiations process offers an opportunity for NASCOE to present the field's concerns and issues to management in an effective manner to promote policy, software, and program requirements as well as enact changes to help our producers and staff with an efficient and effective way of delivering FSA programs. Employees may anonymously submit issues throughout the year as they arise for the NASCOE committee to present to the National Office for a possible resolution.

Who may turn in a submission?

ANYONE

What is the difference between a Negotiations submission and a Programs submission?

Negotiation items are policy driven as listed in the labor management agreement in 22-PM (Rev. 1) Exhibit 22.

Program items are submissions concerning inefficiencies/issues in software, forms, and program requirements.

When can a Negotiations or Programs item be submitted?

ANYTIME

Programs & Negotiations

Two of the most important functions of NASCOE are the Programs and Negotiations processes. These processes provide opportunities for NASCOE to present member's concerns and program issues to FSA program staff and management. Programs and Negotiations activities allow the concerns of membership to be presented in an effective manner and has produced many successful outcomes.

Be sure to clearly state the issue with background and facts, your position on the issue, recommendations for resolution, and any handbook/Notice references.

Example

7. Issue *

Program efficiency/area of concern and procedure reference.

WHAT is the issue?

If you're trying to find an entity that an individual is associated with, there's not a quick way to find the information in our current software.

8. Facts *

Circumstances of the concern.

WHERE or WHY is it an issue?

Right now, there are two ways to find what entity an individual is associated with; however, they aren't quick options, and they are challenging for a new employee to find. In subsidiary we can generate a subsidiary print for an individual and select "Business File" to find what entities someone is associated with. However, a new PT won't be able to easily find that and even though we now know the entity to look up, we still have to go into software again to look up that entity. If there was a way in MIDAS for the entity (entities) to be hyperlinked on an individual's BP page, that would help easily and quickly identify associated entities to an individual.

9. Proposed Solution *

Your suggestion for correcting the inefficiency.

HOW can this be resolved?

In MIDAS, possibly under the representative capacity on an individual's BP page, add a section that shows what their role is for an entity. Then let that information communicate to SCIMS software so if I look up the individual, I can also find that they are associated to an entity.
